

Authors

George B. Dantzig

A.B., 1936, University of Maryland; M.A., 1937, University of Michigan; Ph.D., 1940, University of California. Junior Statistician with U. S. Bureau of Labor Statistics, 1937-39; Teaching Fellowship, Mathematics Department, University of California, Berkeley, 1939-41; Chief Combat, Analysis Branch, Hq. AAF Statistical Control, Washington, D. C., 1941-46; Teaching Fellowship, Mathematics Department, University of California, Berkeley, 1946; Chief Mathematician, Hq. AAF Comptroller, Washington, D. C., 1946-52. The RAND Corporation, Santa Monica, 1952-60. Professor of Engineering Science, Industrial Engineering Department, University of California, Berkeley, 1960; Head, Berkeley Center of Operations Research. Fellow, Econometric Society; Fellow, Operations Research Society; member, American Mathematical Society, Institute of Mathematical Statistics, Association of America, Society for Industrial and Applied Mathematics, Society of Industrial and Applied Mathematics, Phi Kappa Phi, and Sigma Xi. Exceptional Meritorious Award, War Department.

D. Ray Fulkerson

B.A. in Mathematics, Southern Illinois University, 1947; M.S. in Mathematics, 1948, Ph.D. in Mathematics 1951, University of Wisconsin. Joined the Mathematics Division of The RAND Corporation in 1951. Has done research in game theory, linear programming, network flow theory, and combinatorial analysis. Is a member of American Mathematical Society and Operations Research Society of America.

James H. Griesmer

B.S. in Mathematics, University of Notre Dame, 1951; Ph.D. in Mathematics, Princeton University, 1958. Joined IBM in 1957 and has been working on game theory, switching theory, error-correcting codes, and cryogenic logical design at the Yorktown Heights Research Center. Member American Mathematical Society, Mathematical Association of America, Society for Industrial and Applied Mathematics, and Scientific Research Society of America.

Marshall Hall, Jr.

B.A., 1932, Yale University; Henry Fellowship, Cambridge University, 1932-33; Ph.D., 1936, Yale University. Fellow, Institute for Advanced Study, 1936-37. Instructor at Yale University 1937-41; Assistant Professor, 1941-46. U. S. Navy, 1942-45 and 1950-52—highest rank, Lieutenant Commander. Associate Professor at Ohio State University, 1946-48; Professor, 1948-59. Guggenheim Fellowship, 1956. Professor, California Institute of Tech-

nology, 1959. Specialties include group theory, combinatorial analysis, projective geometry, theory of numbers. Is a member of American Mathematical Society, American Association of Mathematics, London Mathematical Society, Phi Beta Kappa, Sigma Xi, Pi Mu Epsilon.

Alan J. Hoffman

A.B., 1947; Ph.D., 1950, Columbia University. Institute for Advanced Study, 1950-51; National Bureau of Standards, 1951-56; Office of Naval Research (London), 1956-57; Consultant—Operations Research and Synthesis Education, General Electric Company, 1957 to present. Member of American Mathematical Society, Mathematical Association of America, Society for Industrial and Applied Mathematics, London Mathematical Society, Association for Computing Machinery, The Institute of Management Sciences, Washington Academy of Sciences, Phi Beta Kappa, Sigma Xi. Associate Editor of *Naval Research Logistics Quarterly*, *Journal of the Association for Computing Machinery*, *Journal of the Society for Industrial and Applied Mathematics*.

Harold W. Kuhn

B.S., 1947, California Institute of Technology; M.A., 1948, Ph.D., 1950, Princeton University. U. S. Army, 1944-46; Henry B. Fine Instructor, Princeton, 1949-50; Fulbright Scholar, Paris, 1950-51; Lecturer, Princeton, 1951-52. Assistant Professor, 1952-56, Associate Professor, 1956-59, Bryn Mawr College. NSF Senior Postdoctoral Fellow, London School of Economics, 1958-59; Associate Professor, Economics and Mathematics, Princeton, 1959. Executive Secretary, Division of Mathematics, National Research Council-National Academy of Sciences, 1957; consultant to IBM Research Center on combinatorial problems, 1959. His areas of specialization have been mathematical economics, games and programming, and combinatorial problems.

Raymond E. Miller

B.S. in M.E., University of Wisconsin, 1950; B.S. in E.E., University of Illinois, 1954; M.S. in Mathematics, 1955 and Ph.D. in Electrical Engineering, University of Illinois, 1957. Research Assistant in the Digital Computer Laboratory, University of Illinois, 1953-56; Research Associate, 1957. Held RCA Fellowship at University of Illinois, 1956-57. Joined IBM in August, 1950. Engaged in research in switching theory and combinatorial problems since September, 1957 at IBM Yorktown Heights Research Center. Visiting Assistant Professor, Digital Computer Laboratory, University of Illinois, September, 1960-February, 1961. Member of the Institute of Radio Engineers, Association for Computing Machinery,

559

Research Society of America, Sigma Xi, Pi Tau Sigma, Tau Beta Pi, and Phi Kappa Phi.

Edward F. Moore

B.S. in Chemistry, Virginia Polytechnic Institute, 1947; M.S. in Mathematics, 1949; Ph.D. in Mathematics, 1950, Brown University. Was an Assistant Professor of Mathematics on the Electronic Digital Computer project of the University of Illinois, 1950-51. Since 1951 has been a member of technical staff of Bell Telephone Laboratories, at Murray Hill. His research has been related to switching theory, automata theory, the capabilities and limitations of machines, information retrieval, and self-reproducing machines. Is a member of the American Mathematical Society, the Association for Computing Machinery, Association for Symbolic Logic, the Cave Research Group, Institute of Radio Engineers, National Speleological Society, Phi Kappa Phi, Phi Lambda Upsilon, and Sigma Xi.

John Riordan

B.S., Yale University, 1923. Was associated with United Electric and Power Company, 1923-26; American Telephone and Telegraph Company, 1926-34; Bell Telephone Laboratories Inc., 1934 to date. Has specialized in electric circuit theory, telephone traffic and combinatorial analysis. Is a member of American Mathematical Society, Institute of Mathematical Statistics, Mathematical Association of America, Yale Engineering Society, and American Association for Advancement of Science.

J. Paul Roth

B.M.E., University of Detroit, Michigan, 1946; M.S. in Mathematics, 1948; Doctor of Philosophy (Mathematics) University of Michigan (Ann Arbor) 1953. Joined IBM in July, 1956. Was employed as Research Engineer, Continental Aviation and Engineering Corporation, Detroit, Michigan 1946-47; Research Associate, mathematics group, Engineering Research Institute, University of Michigan, Ann Arbor, 1947-53; Pierce Instructor of Mathematics, University of California, Berkeley, 1953-55; Staff Mathematician, electronic computer project, Institute for Advanced Study, Princeton, working under grant supported by Army, Office of Naval Research and Air Research and Development Command; Visiting Assistant Professor of Mathematics, Princeton University, 1957-58. Professor of Centro Internazionale Matematico Estivo, Varenna, Italy (summer of 1959). Is presently Research Staff Member in charge of combinatorial mathematics, Yorktown Heights Research Center. Member of American Mathematical Society, Society for Industrial and Applied Mathematics, and Sigma Xi.

Herbert J. Ryser

B.A. in Mathematics, 1945; M.A. in Mathematics, 1947, Ph.D. in Mathematics, 1948, University of Wisconsin. Member, Institute for Advanced Study, 1948-49. Joined the staff of the Ohio State University in 1949 and is currently Professor of Mathematics. Is also consultant

to The RAND Corporation. Has done research in number theory, matrix theory, projective planes, and combinatorial analysis. Is a member of American Mathematical Society and American Mathematical Association.

John L. Selfridge

B.S. in Mathematics, 1951, University of Washington; Ph.D. in Mathematics, UCLA, 1958. Joined IBM in 1958 at the Yorktown Heights Research Center. From 1951-52 was Numerical Analyst, Sparrow Project, U. S. Naval Air Missile Test Center, Point Mugu, California; Summer Fellow, 1953 at the National Bureau of Standards Institute for Numerical Analysis, Los Angeles, California; 1954-57, Graduate Research Mathematician, Numerical Analysis Research, UCLA; 1957-58 Instructor, Mathematics Department, UCLA; 1960-61, Visiting Associate Professor, Mathematics Department, University of Washington. Is a member of American Mathematical Society, Duodecimal Society of America, and Phi Beta Kappa.

Robert R. Singleton

A.B., Dartmouth College, 1934; M.Sc., Brown University, 1935; graduate work at Princeton University, 1935-36; (all in Mathematics). Research Associate with The Princeton Surveys, Princeton University, 1937-42, on research in government affairs. With Merrill Flood and Associates, 1942-45; Director Development for Aero Service Corporation, 1946-52; private consultant, 1952-56—all these in engineering research and development, mostly on reconnaissance and information systems. Joined General Electric Company in 1956 as a Consultant in Operations Research and Synthesis Consulting Service. Member of American Mathematical Society, American Association for Advancement of Science, The Institute of Management Sciences, Sigma Xi, and Phi Beta Kappa.

Albert W. Tucker

A.B., 1928, M.A., 1929, University of Toronto; Ph.D., 1932, Princeton University. National Research Council Fellow, 1932-33, Cambridge, Harvard, Chicago. He has been a faculty member at Princeton University since 1933 and is currently Albert Baldwin Dod Professor of Mathematics and Chairman of the Department. In 1941-45 he served as Associate Director of the Fire Control Research Project, and since 1948 as Director of the Office of Naval Research Logistics Project. Professor Tucker has edited the *Princeton Mathematical Series* since its inception in 1938. He is a consultant to the RAND Corporation and to the International Business Machines Corporation. Chairman of the Commission on Mathematics, College Entrance Examination Board, and member of the Physical Sciences Program Committee of the Alfred P. Sloan Foundation, 1955-59. His areas of specialization include topology, game theory, mathematical programming and combinatorics. Is Fellow of the American Association for the Advancement of Science, member of Sigma Xi, American Mathematical Society, Mathematical Association, Institute of Mathematical Statistics, Econometric Society and Society for Industrial and Applied Mathematics.

Contents of Previous Two Issues

July 1960

Vol. 4, No. 3

- Articles on vapor growth:
 - Epitaxial Vapor Growth of Ge Single Crystals in a Closed-Cycle Process
by *J. C. Marinace* 248-255
 - Electrical Properties of Vapor-Grown Ge Junctions
by *M. J. O'Rourke, J. C. Marinace, R. L. Anderson and W. H. White* 256-263
 - A Vapor-Grown Variable Capacitance Diode
by *R. L. Anderson and M. J. O'Rourke* 264-268
 - Radiotracer Studies of the Incorporation of Iodine into Vapor-Grown Ge
by *W. E. Baker and D. M. J. Compton* 269-274
 - Incorporation of As into Vapor-Grown Ge
by *W. E. Baker and D. M. J. Compton* 275-279
- Letters to the Editor:
 - Tunnel Diodes by Vapor Growth of Ge on Ge and on GaAs
by *J. C. Marinace* 280-282
 - Germanium - Gallium Arsenide Heterojunctions
by *R. L. Anderson* 283-287
 - Epitaxial Growth of Silicon
by *E. S. Wajda, B. W. Kippenhan and W. H. White* 288-295
 - Incorporation of Au into Vapor-Grown Ge
by *W. E. Baker and D. M. J. Compton* 296-298
 - Impurity Introduction during Epitaxial Growth of Silicon
by *R. Glang and B. W. Kippenhan* 299-301
 - Dislocation Content in Epitaxially Vapor-Grown Ge Crystals
by *H. S. Ingham, Jr. and P. J. McDade* 302-304
- Regular articles:
 - Physical versus Logical Coupling in Memory Systems
by *J. A. Swanson* 305-310
 - Synthesis of a Communication Net
by *R. T. Chien* 311-320
 - Synthesis of Switching Functions by Linear Graph Theory
by *W. Mayeda* 321-328
 - Error Correcting Codes for Correcting Bursts of Errors
by *J. E. Meggitt* 329-334
 - A Character-Recognition Study
by *W. E. Dickinson* 335-348
 - On Dimensional Analysis*
by *R. E. Thun* 349-356
- Letters to the Editor:
 - Note on Perturbation of a Uniform Magnetic Field by a Cube of Magnetic Material†
by *F. Partovi* 357-358
 - Space-Charge-Limited Currents in Resin Films
by *R. E. McCurry and R. M. Schaffert* 359-363
 - A Cyclic Code for Double Error Correction
by *C. M. Melas* 364-366

October 1960

Vol. 4, No. 4

- Articles:
 - Fourier Analysis of the Motion of a Hydraulically Controlled Piston
by *H. J. Greenberg* 378-390
 - Shock Waves in Nonlinear Transmission Lines and Their Effect on Parametric Amplification
by *R. Landauer* 391-401
 - On the Switching Time of Subharmonic Oscillators
by *A. H. Nethercot, Jr.* 402-406
 - A Duality Theorem for Convex Programs
by *W. S. Dorn* 407-413
- Letters to the Editor:
 - A Class of Optimal Noiseless Load-Sharing Matrix Switches
by *R. T. Chien* 414-417
 - New Developments in Load-Sharing Matrix Switches
by *G. Constantine, Jr.* 418-422
 - High-Speed Counter Requiring No Carry Propagation
by *W. N. Carroll* 423-425
 - Increasing the Brightness-Voltage Nonlinearity of Electroluminescent Devices
by *J. A. O'Connell and B. Narken* 426-429
 - Determining Component Variation for Gradual Transition between Dissimilar Impedances
by *C. Becker, C. M. Bruen and R. B. Turner* . . 430-438

The IBM Journal of Research and Development is regularly indexed and abstracted by Science Abstracts (I.E.E.—Britain), Chemical Abstracts, The Engineering Index, Physikalische Berichte, ASM Review of Metal Literature, Mathematical Reviews, Computing Reviews, Computer Bibliography (Technical Information Co.—Britain), Bulletin Signalétique (C.N.R.S.—France), Electronic Industries & Tele-Tech, Electronic & Radio Engineer, Semiconductor Electronics, Psychological Abstracts, Aviation Research & Development and the Library of U. S. Naval Research Laboratory.
